2022-07-Present — Full-Stack Developer
Serverless Team

Projects

Back-End

AWS Shortlinker API
Project showcases AWS-native link shortener service. User can register or log in and after that provide any link and expire date and receive shortened version of it that will expire according to request (after visit, in 1 day, in 3 days or in 7 days). After expiration of link, user, who created this link, will receive email notification.

[Demo](#)
